Description:

Post-operative therapy and rehab is critical for a patient to return to full function after surgery, it needs to be thorough, timely, and specific to each individual and their goals and mobility levels. The physical therapists at Pain Physicians NY work closely with the surgeon and patient to provide the most comprehensive post-operative care and have each patient achieve their mobility goals.

The reason we take so much time figuring out precisely where the trouble is, is because we treat the individual, not just the injury or illness. In order to get successful results, physical therapy needs to address any underlying factors that may be contributing to your pain.

We understand the amount of trust and hope you are placing in our hands, and you can be sure that we do not take the responsibility lightly. Our team of professionals have dedicated their lives to helping others lead a pain-free lives. Our physical therapists are not out of touch, and would be more than happy to answer any questions you may have.

Using the latest techniques and technologies, our professionals are always on their A game and will help you get on yours. Don't give up on the things you love in life because of your aches and pains. Meet them head-on. It may take some time, dedication and hard work from the team and from you, but together we can set you on the course for a pain-free life.
